Analysis of Mine Fires for All U.S. Metal/Nonmetal Mining Categories,1990-2001 Maria I. De Rosa, Centers for Disease Control and Prevention, National Institute for Occupational Safety and Health

This report analyzes mine fires for all U.S. underground and surface metal/nonmetal mining categories during 1990–2001 by state and six successive 2-year time periods. Injury risk rates are derived, and ignition source, methods of detection and suppression, and other variables are examined. Fires involving contractors are also included in the analysis. The data were derived from Mine Safety and Health Administration (MSHA) mine fire accident publications and verbal communications with mine personnel. The analysis will provide the National Institute for Occupational Safety and Health, MSHA, and the mining industry with a better understanding of the causes and hazards associated with mine fires and an increased awareness aimed at preventing and reducing fire hazards.

From reader reviews:

Morris Whitfield:

Book is usually written, printed, or created for everything. You can realize everything you want by a e-book. Book has a different type. As it is known to us that book is important point to bring us around the world. Beside that you can your reading proficiency was fluently. A reserve Analysis of Mine Fires for All U.S. Metal/Nonmetal Mining Categories,1990-2001 will make you to become smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think this open or reading a book make you bored. It is far from make you fun. Why they could be thought like that? Have you searching for best book or suited book with you?

Walter Blankenship:

What do you consider book? It is just for students because they're still students or it for all people in the world, the particular best subject for that? Just you can be answered for that concern above. Every person has several personality and hobby per other. Don't to be compelled someone or something that they don't wish do that. You must know how great along with important the book Analysis of Mine Fires for All U.S. Metal/Nonmetal Mining Categories,1990-2001. All type of book can you see on many options. You can look for the internet options or other social media.

Bryan Foxworth:

This Analysis of Mine Fires for All U.S. Metal/Nonmetal Mining Categories,1990-2001 is new way for you who has curiosity to look for some information since it relief your hunger info. Getting deeper you onto it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Analysis of Mine Fires for All U.S. Metal/Nonmetal Mining Categories,1990-2001 can be the light food in your case because the information inside that book is easy to get by means of anyone. These books build itself in the form and that is reachable by anyone, yes I mean in the e-book type. People who think that in reserve form make them feel drowsy even dizzy this book is the answer. So there isn't any in reading a publication especially this one. You can find what you are looking for. It should be here for a person. So , don't miss that! Just read this e-book kind for your better life as well as knowledge.

Anita Rodriguez:

As a university student exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some publication, they are complained. Just tiny students that has reading's internal or real their hobby. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's

country. Therefore this Analysis of Mine Fires for All U.S. Metal/Nonmetal Mining Categories,1990-2001 can make you sense more interested to read.
