The Nursing Shortage: Strategies for Recruitment and Retention in Clinical Practice and Education

Harriet R. Feldman

This book presents an overview of innovative initiatives to combat the nursing shortage that are being pioneered in a number of states, schools of nursing, and health care institutions. Among the strategies described are preceptor and mentoring arrangements, scholarship/work payback agreements, private and public funding initiatives to support the education of future nurses, and service/education partnership models. An international perspective is added by a chapter on initiatives in a hospital in Iceland.
