Industrial Controls and Manufacturing (Engineering) Edward W. Kamen

This book is intended for individuals who wish to take advantage of the growing opportunities that exist in the controls field with applications to manufacturing. The book contains an introductory treatment of the essential topics including process control, discrete logic control, ladder logic diagrams, manufacturing systems, and production control. The required background for reading the text is prior exposure to the concepts of signals and systems. This book is written at a level appropriate for junior or senior level engineering students in industrial, mechanical, chemical, and electrical engineering. The text can also be used as a technical reference for professional engineers who wish to obtain some exposure to the fundamentals of industrial controls and manufacturing. Features of the book are:

- * Covers both analog and digital control using P/PI/PID controllers and discrete logic control using ladder logic diagrams and programmable logic controllers
- * Contains a brief introduction to model predictive control, adaptive control, and neural net control
- * Covers control from the device/process level up to and including the production system level
- * Contains an introduction to manufacturing systems with the emphasis on performance measures, flow-line analysis, and line balancing
- * Contains a chapter on equipment interfacing with a brief introduction on OLE for process control (OPC), the GEM standard, fieldbuses, and Ethernet
- * Material is based on a course with a lab project developed and taught at the Georgia Institute of Technology
- * Coverage is at the introductory level with a minimal amount of background required to read the text

From reader reviews:

William Lee:

Have you spare time for any day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the actual Mall. How about open or even read a book entitled Industrial Controls and Manufacturing (Engineering)? Maybe it is to be best activity for you. You recognize beside you can spend your time with your favorite's book, you can better than before. Do you agree with it is opinion or you have other opinion?

Maritza Berry:

Nowadays reading books are more than want or need but also get a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book that improve your knowledge and information. The details you get based on what kind of book you read, if you want attract knowledge just go with knowledge books but if you want truly feel happy read one along with theme for entertaining including comic or novel. The particular Industrial Controls and Manufacturing (Engineering) is kind of e-book which is giving the reader capricious experience.

John Moore:

Reading can called mind hangout, why? Because when you are reading a book mainly book entitled Industrial Controls and Manufacturing (Engineering) your brain will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely will become your mind friends. Imaging each word written in a reserve then become one form conclusion and explanation this maybe you never get previous to. The Industrial Controls and Manufacturing (Engineering) giving you an additional experience more than blown away the mind but also giving you useful data for your better life on this era. So now let us explain to you the relaxing pattern the following is your body and mind will probably be pleased when you are finished studying it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

Jennifer Bell:

Reading a book to become new life style in this yr; every people loves to learn a book. When you go through a book you can get a wide range of benefit. When you read books, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and also soon. The Industrial Controls and Manufacturing (Engineering) provide you with a new experience in looking at a book.
