Power Electronics for Renewable Energy Systems, Transportation and Industrial Applications

Haitham Abu-Rub, Mariusz Malinowski, Kamal Al-Haddad

Compiles current research into the analysis and design of power electronic converters for industrial applications and renewable energy systems, presenting modern and future applications of power electronics systems in the field of electrical vehicles

With emphasis on the importance and long-term viability of Power Electronics for Renewable Energy this book brings together the state of the art knowledge and cutting-edge techniques in various stages of research. The topics included are not currently available for practicing professionals and aim to enable the reader to directly apply the knowledge gained to their designs. The book addresses the practical issues of current and future electric and plug-in hybrid electric vehicles (PHEVs), and focuses primarily on power electronics and motor drives based solutions for electric vehicle (EV) technologies. Propulsion system requirements and motor sizing for EVs is discussed, along with practical system sizing examples. Key EV battery technologies are explained as well as corresponding battery management issues. PHEV power system architectures and advanced power electronics intensive charging infrastructures for EVs and PHEVs are detailed. EV/PHEV interface with renewable energy is described, with practical examples. This book explores new topics for further research needed world-wide, and defines existing challenges, concerns, and selected problems that comply with international trends, standards, and programs for electric power conversion, distribution, and sustainable energy development. It will lead to the advancement of the current state-of-the art applications of power electronics for renewable energy, transportation, and industrial applications and will help add experience in the various industries and academia about the energy conversion technology and distributed energy sources.

- Combines state of the art global expertise to present the latest research on power electronics and its application in transportation, renewable energy and different industrial applications
- Offers an overview of existing technology and future trends, with discussion and analysis of different types of converters and control techniques (power converters, high performance power devices, power system, high performance control system and novel applications)
- Systematic explanation to provide researchers with enough background and understanding to go deeper in the topics covered in the book

From reader reviews:

Bob Bartlett:

Nowadays reading books be than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The details you get based on what kind of e-book you read, if you want attract knowledge just go with knowledge books but if you want feel happy read one having theme for entertaining for example comic or novel. The actual Power Electronics for Renewable Energy Systems, Transportation and Industrial Applications is kind of e-book which is giving the reader unpredictable experience.

Donald Cortes:

This book untitled Power Electronics for Renewable Energy Systems, Transportation and Industrial Applications to be one of several books in which best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit onto it. You will easily to buy this particular book in the book shop or you can order it through online. The publisher of the book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Smartphone. So there is no reason to you to past this e-book from your list.

Fredrick Alfred:

Spent a free time and energy to be fun activity to complete! A lot of people spent their spare time with their family, or their particular friends. Usually they undertaking activity like watching television, going to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? May be reading a book may be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the e-book untitled Power Electronics for Renewable Energy Systems, Transportation and Industrial Applications can be excellent book to read. May be it can be best activity to you.

Joan Green:

Beside this kind of Power Electronics for Renewable Energy Systems, Transportation and Industrial Applications in your phone, it may give you a way to get nearer to the new knowledge or information. The information and the knowledge you can got here is fresh through the oven so don't become worry if you feel like an older people live in narrow village. It is good thing to have Power Electronics for Renewable Energy Systems, Transportation and Industrial Applications because this book offers to you readable information. Do you sometimes have book but you don't get what it's exactly about. Oh come on, that will not happen if you have this in your hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. Use you still want to miss it? Find this book and also read it from at this point!
