Mechanical-Electrical Systems Instructor's Manual Department of Health and human Services Centers for Disease Control and Prevention, National Institute for Occupational Safety and Health

This manual is for one of four PtD education modules to increase awareness of construction hazards. The modules support undergraduate courses in civil and construction engineering. The four modules cover the following: 1. Reinforced concrete design 2. Mechanical–electrical systems 3. Structural steel design 4. Architectural design and construction. This manual is specific to a PowerPoint slide deck related to Module 2, Mechanical–electrical systems. It contains learning objectives, slide-by-slide lecture notes, case studies, test questions, and a list of citations. It is assumed that the users are experienced professors/lecturers in schools of engineering. As such, the manual does not provide specifics on how the materials should be presented. However, background insights are described for most of the slides for the instructor’s consideration.
