This Strange Quantum World and You is a book for those from 9 to 90 who wish to gain some understanding of this quantum world. This smaller-than-an-atom world can't be seen, but there are ways to gain insight into its workings. This book is geared toward children and provides a few simple experiments that explain how energy and matter are two different states of the same thing. Learning how information is carried at faster than lightning speeds suggests the conclusion that we are all connected in some way. This leads children to a feeling of belonging. It also illustrates the necessity of watching how we think, speak, and act, so that we do more responsible job of caring for our Earth and for each other.
