Sustainable Coastal Management: A Transatlantic and Euro-Mediterranean Perspective (Nato Science Series: IV:)

Recent assessment of progress in coastal management at the national level shows an impressive growth of efforts after the 1992 Earth Summit, particularly in Europe and the Mediterranean. This book contains regional surveys of coastal management progress in Europe and the Mediterranean since 1992, discussion regional trends, development sin decision making, and cooperative activities. It then goes on to assess national progress towards coastal management, including the development of national coastal management systems, efforts at coordinated planning and management, and the development and use of environmental codes of practice. It then examines selected priority issues in the Northern Adriatic: economic integration and regional economic development, international scientific and technological cooperation in marine affairs and coastal tourism. Finally, the book covers the use of GIS in coastal environments and coastal engineering, the role played by scientific information in coastal policy, and the importance of free trade agreements.
