**Health As Expanding Consciousness (National League for Nursing Series (All Nln Titles))** Margaret A. Newman

Health and illness are not opposed, and disease is not an enemy that strikes a victim. Rather, health and disease are synthesized parts of a unitary whole, dialectically fused in an individual and the environment. This book offers a vital new approach, focusing on the pattern of the whole and advancing caring as the key moral and professional imperative for promoting health. Essential for all nursing and health care educators, practitioners, and students.
