The natural laws of husbandry Volume 1863, pt. 1 Justus Liebig

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1863 Excerpt: ...from the fields manured with farm-yard dung, we find:--Increase of produce by farm-yard manuring, per acre. Cunnersdorf KUltz Oberbobritzsch Quantity of farm-yard manure. 180 cwt. 229 cwt. 314 cwt. Corn 347 lbs. 352 lbs. 452 lbs. Straw 1743 ,, 1006 ,, 914 ,, The field in Cunnersdorf, manifestly the richest in substances nutritive for straw, gave the largest straw-crop, although it had received the smallest quantity of farmyard manure. In the increased produce, corn was to straw as 1: 5, clearly showing that sparing application of straw-manure was the proper course to pursue here. This fact readily explains also why the field at Oberbobritzsch, comparatively poorer in straw-constituents, required 85 cwt. of farm-yard manure more than the Kotitz field, to enable it to maintain, in its increased produce, the same proportion of corn and straw (1: 2) as in the crop from the unmanured plot. These considerations might, perhaps, lead the practical farmer to the conviction that he is, after all, not much of a free agent in the cultivation of his fields, and that the ' facts and circumstances' which guide him in his proceedings are simply laws of nature, of whose existence he has scarcely any conception. In truth, it may be said that the agriculturist is a free agent only in his wrongdoings. If he acts in accordance with his own interest, he must allow himself to be guided, even though unconsciously, by the condition of his land; and the only matter for wonder is, how far the man of ' experience' has succeeded in this way. A system of farming, to be called truly rational, must be exactly suited to the nature and condition of the soil; for it is only when the rotation of crops or the mode of manuring is conformable to the composition of the soil, that ...
