Passive Optical Networks: Flattening the Last Mile Access (IEEE Comsoc Pocket Guides to Communications Technologies) Stephen B. Weinstein, Yuanqiu Luo, Ting Wang

Describes the major architectures, standards, and technologies of Passive Optical Networks (PONs)The ComSoc Guide to Passive Optical Networks provides readers with a concise explanation of the key features of Passive Optical Networks (PONs); the different types of PON architectures and standards; key issues of PON devices, management, and implementation; and the promising business opportunities in access networks.Written for a broad audience, ranging from developers to users, this indispensable book provides an understanding o the evolutionary path of PON access systems and their positioning with respect to the cable, copper, and wireless competitors for broadband access networks. In addition, The ComSoc Guide to Passive Optical Networks: Provides brief, high-level overviews of the architectures and applications of Fiber-to-the-Home (FTTH) or Fiber-to-the-Curb (FTTC) access networks and the alternative HFC, subscriber line, and WiMAX access systems Awards readers with a clear understanding of what BPON, GPON, WDM-PON and EPON are and how they work, together with an introduction to their respective standards Carefully defines all acronyms and technical terms, making the book accessible to those who may not be specialists in this area Gives readers an appreciation of the last mile problems in telecommunications access networks, and the opportunities in optical-wireless integration

From reader reviews:

Erin Chretien:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each reserve has different aim or even goal; it means that publication has different type. Some people truly feel enjoy to spend their time for you to read a book. They are reading whatever they consider because their hobby is actually reading a book. What about the person who don't like examining a book? Sometime, person feel need book once they found difficult problem as well as exercise. Well, probably you will require this Passive Optical Networks: Flattening the Last Mile Access (IEEE Comsoc Pocket Guides to Communications Technologies).

Bryce Adams:

A lot of people always spent their free time to vacation or perhaps go to the outside with them household or their friend. Do you know? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity that's look different you can read any book. It is really fun for yourself. If you enjoy the book that you just read you can spent all day long to reading a guide. The book Passive Optical Networks: Flattening the Last Mile Access (IEEE Comsoc Pocket Guides to Communications Technologies) it is rather good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. In the event you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore quickly to read this book from a smart phone. The price is not to fund but this book features high quality.

Pamela Wilson:

This Passive Optical Networks: Flattening the Last Mile Access (IEEE Comsoc Pocket Guides to Communications Technologies) is new way for you who has curiosity to look for some information mainly because it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know or perhaps you who still having bit of digest in reading this Passive Optical Networks: Flattening the Last Mile Access (IEEE Comsoc Pocket Guides to Communications Technologies) can be the light food for yourself because the information inside this kind of book is easy to get through anyone. These books build itself in the form and that is reachable by anyone, that's why I mean in the e-book application form. People who think that in guide form make them feel sleepy even dizzy this reserve is the answer. So there is not any in reading a book especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss this! Just read this e-book variety for your better life and knowledge.

Hugo Carter:

Reserve is one of source of understanding. We can add our information from it. Not only for students but also native or citizen have to have book to know the upgrade information of year to be able to year. As we

know those ebooks have many advantages. Beside we add our knowledge, also can bring us to around the world. With the book *Passive Optical Networks: Flattening the Last Mile Access (IEEE Comsoc Pocket Guides to Communications Technologies)* we can take more advantage. Don't someone to be creative people? To get creative person must prefer to read a book. Just simply choose the best book that appropriate with your aim. Don't be doubt to change your life with that book *Passive Optical Networks: Flattening the Last Mile Access (IEEE Comsoc Pocket Guides to Communications Technologies)*. You can more inviting than now.
