Webbots, Spiders, and Screen Scrapers: A Guide to Developing Internet Agents with PHP/CURL

Michael Schrenk

The Internet is bigger and better than what a mere browser allows. *Webbots, Spiders, and Screen Scrapers* is for programmers and businesspeople who want to take full advantage of the vast resources available on the Web. There's no reason to let browsers limit your online experience-especially when you can easily automate online tasks to suit your individual needs.

Learn how to write webbots and spiders that do all this and more:

Exchange data with FTP and NNTP servers Sample projects using standard code libraries reinforce these new skills. You'll learn how to create your own webbots and spiders that track online prices, aggregate different data sources into a single web page, and archive the online data you just can't live without. You'll learn inside information from an experienced webbot developer on how and when to write stealthy webbots that mimic human behavior, tips for developing fault-tolerant designs, and various methods for launching and scheduling webbots. You'll also get advice on how to write webbots and spiders that respect website owner property rights, plus techniques for shielding websites from unwanted robots. As a bonus, visit the author's website to test your webbots on sample target pages, and to download the scripts and code libraries used in the book. Some tasks are just too tedious-or too important!- to leave to humans. Once you've automated your online life, you'll never let a browser limit the way you use the Internet again.
